IT Setup, Security & Employee Perks Guide

Welcome to the Engineering Organization. This document outlines your hardware setup, network security requirements, and internal benefits.

Hardware Provisioning: All engineers receive a 16-inch Apple MacBook Pro M3 Max (36GB RAM, 1TB SSD) or Dell XPS 15 (64GB RAM). Hardware refreshes occur every 24 months.

Zero-Trust Network Access (ZTNA): Install Cloudflare WARP and authenticate with Okta single sign-on. Direct SSH to production servers is strictly prohibited; all cluster access requires Teleport bastion certificates.

Wellness and Education Stipends: Every team member is entitled to a $1,500 annual Learning & Development budget for books, certifications, and technical conferences. You also receive a $100 monthly fitness and wellness reimbursement submitted through Expensify.

Remote Work Setup Allowance: A one-time $1,000 home office setup allowance is provided to purchase an ergonomic chair, external 4K monitor, or standing desk.
